OLED

LG OLED is not just a new TV, it's an entirely new category of television. OLED, short for organic light emitting diode, is a revolutionary technology with self-lighting pixels that switch off to achieve perfect black and infinite contrast. LG OLED TVs are available in Full HD and 4K resolution.

OLED HDR

LG OLED televisions with OLED HDR better reproduce images to deliver a stunning picture that looks more like real life. With OLED HDR, images have brighter colors, darker blacks and a better contrast for an exceptional viewing experience.

INFINITE CONTRAST

The individually illuminating pixels of LG OLED TV can switch off completely to achieve perfect black. That means that contrast—the difference between the lightest and darkest areas of the screen is truly infinite for a more natural, lifelike image with bolder colors.
