DESCRIPTION

Radiant color, refined with AI

Experience vivid, luminous colors and deep blacks with LG QNED's combination of quantum dot and NanoCell technology illuminated by Mini LEDs for an exhilarating watching experience.

KEY FEATURES

QNED Contrast

Brighter Colors

TV entertainment never looked better thanks to our Mini LED technology, for incredibly bright colors you can feel. Hundreds of miniature LED backlight zones operate independently, for movies with excellent dark-level detail and deep blacks, while minimizing halo effects.

α8 AI Processor

Refined picture, powered by AI

No more fiddling with picture settings. The α8 AI Processor 4K with AI Picture Pro identifies the type of content you're watching to automatically select the ideal setting and fine-tune the picture for the best watching experience and with Multi View with 2 screens lets you split your screen into two unique views so you can watch even more than before.

*Multi View may display 1-HDMI input, screen share, or select apps.

webOS 24 & LG Channels

A galaxy of entertainment at your fingertips

No matter which TV you choose, your LG TV makes it easier than ever to find what you need and more. Browse all your favorite streaming apps and let LG Channels connect you to 300+ free channels of sports, fitness, cooking and more.*

*Internet connection and subscriptions to streaming services are required; number of LG Channels subject to change.

Quantum Dot NanoCell Color Technology

Sensational color

Only LG Quantum Dot TVs add a nanocell layer that removes unwanted light for richer more colorful picture with extended contrast.

Advanced Gameplay

Amped-up and ready for the win

Experience real-time action with virtually no tearing from FreeSync™, VRR and GeForce NOW for cloud gaming.* Plus, the LG Game Optimizer, Game Dashboard and four HDMI 2.1 ports get you (and keep you) in the action.

*Subscription and compatible gaming controller are required.

PICTURE (PANEL)

Display Type	4K QNED MiniLED
