- Quantum Dot NanoCell Color Technology
- MiniLED Backlighting with Precision Dimming Pro+
- Home Theater Experience with Dolby Vision, Filmmaker and Dolby Atmos®

*Image quality of upscaled content will vary based on source resolution.

DESCRIPTION

Color Your World in 8K

Experience everything you love with the latest in TV color technology—the 8K Quantum Dot NanoCell Display that combines MiniLED backlights with richer, more accurate color expressions for our brightest, most vibrant picture in our best fully loaded LED.

KEY FEATURES

QNED Contrast

Brighter Colors

TV entertainment never looked better, thanks to our Mini LED technology, for incredibly bright colors you can feel. Hundreds of miniature LED backlight zones operate independently, for movies with excellent dark-level detail and deep blacks, while minimizing halo effects.

8K Resolution & 8K Upscaling*

What's next is now

LG QNED 8K TV brings details to life on our highest resolution QNED TV. An epic metamorphosis instantly transform all your regular and 4K content into an 8K-like viewing experience.*

*Image quality of upscaled content will vary based on source resolution.

α9 Gen7 AI Processor 8K

Enhanced picture that wows in 8K

Get the picture you crave even when you're not tuned in to 8K content thanks to AI Super Upscaling in 8K. The α9 Gen7 AI Processor 8K, engineered specifically for LG TVs, automatically adjusts your settings to improve picture and sound qualities based on whatever you're watching.

*Image quality of upscaled content will vary based on the source resolution.

Quantum Dot NanoCell Color Technology

Sensational color

Only LG Quantum Dot TVs add a nanocell layer that removes unwanted light for richer more colorful picture with extended contrast.

MiniLED Backlighting with Precision Dimming Pro+

Brighter and bolder

LG Precision Dimming Pro+ controls MiniLEDs that are 40x smaller with thousands of dimming zones that can be individually controlled for better black levels and brighter colors.
