About Valerion

Valerion specializes in home cinema projectors, delivering an unparalleled cinematic experience through advanced RGB laser technology and precision-engineered lens systems. Our flagship VisionMaster series sets new standards in home theater innovation. Committed to excellence in home entertainment, we leverage cutting-edge technology to offer an immersive viewing experience that is truly unmatched.

Key Milestones

Best of IFA 2024

September 6, 2024

Valerion made its debut at IFA 2024, earning the prestigious “Best of IFA 2024” award from PCWELT and GameStar, solidifying its position as a rising innovator in visual technology.

“Best Lifestyle Projector”

November 8, 2024

Recognized by The Hook Up as the “Best of Lifestyle Projector Comparison Battle: Overall Top Pick”, reflecting Valerion’s unparalleled performance and design.

2024’s Top Crowdfunding Campaign—Over \$10M!

November 21, 2024

Successfully concluded our Kickstarter campaign, raising over \$10 million, making it the most-funded campaign of 2024 and the most-funded projector project in crowdfunding history.

CES 2025 Presence

January 7, 2025

The Valerion VisionMaster Max will make its highly anticipated debut demo at CES 2025. Furthermore, the entire VisionMaster Series will be featured in immersive, interactive use-case scenarios, showcasing their cutting-edge capabilities like never before.

Media Endorsements

Although a smart projector, the Valerion VisionMaster Pro 2 is closer in performance and features to high-end home cinema projectors.

The Pro 2 represents a step in the right direction for DLP projectors. It brings notable brightness and contrast, delivering vibrant visuals that hold their own in a range of lighting conditions.

The result is an image that comes as close to the real cinema experience as almost anything else.

The Valerion VisionMaster Plus 2 is the first huge step towards making the advantages of large pro projectors affordable and handy, all for comparatively little money.

ProVision Engine™

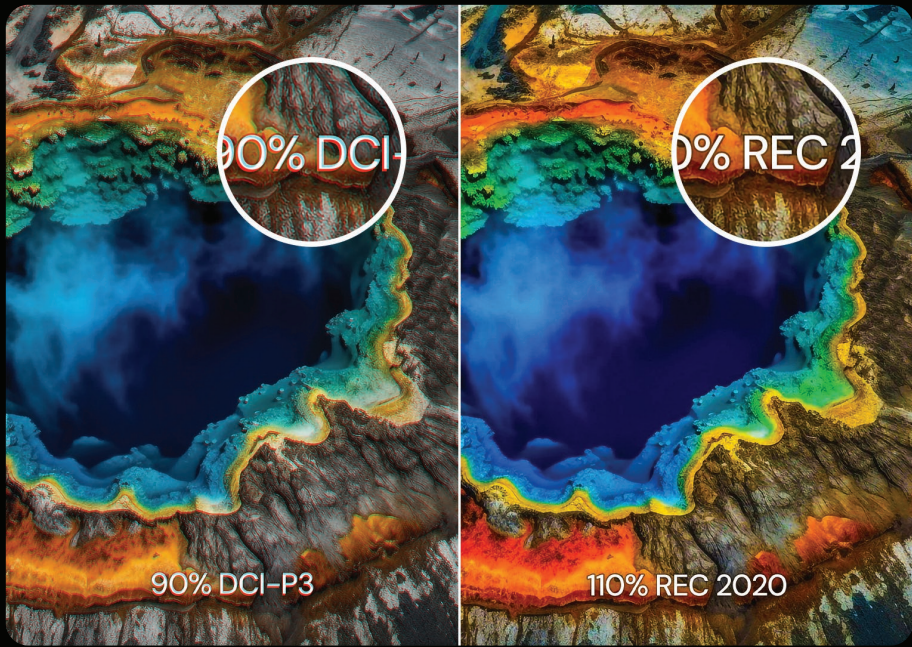

The groundbreaking technology that sets us apart as the first triple laser projector with a professional-grade lens system powered by the advanced AI-SoC platform, MT9618. It delivers a true cinematic experience with impeccable frames and cutting-edge smart lifestyle features.

Cinematic Visuals, No More Poor Details & Washed Out Image

With ultra high contrast of 15000:1, deliver incredibly deep blacks details that add a profound sense of depth to every image.

15000:1

1000:1

Spectacularly Furious Colors

Immerse yourself in cinematic experiences with 3000 ISO Lumens and a 110% Rec.2020 wide color gamut, delivering intensely vibrant visuals with minimal rainbow effect.

Out-of-the-Box Color Perfection

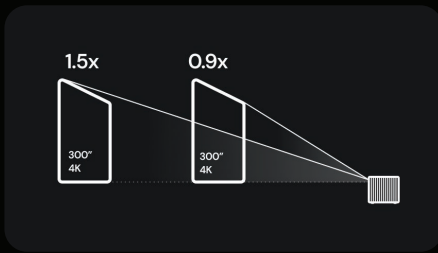

Enjoy unparalleled color accuracy with ISF-certified professional calibration, offering flawless colors right from the start.

AI Super Resolution

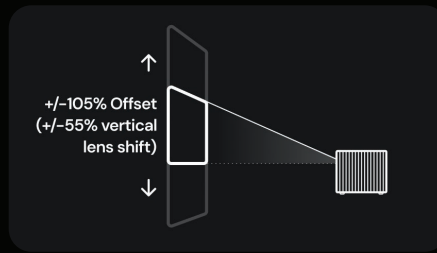

Transform every detail from Full HD to stunning 4K, elevating your entertainment to a new level of brilliance and clarity.

OpticFlex Lens System Breaking Space Limits

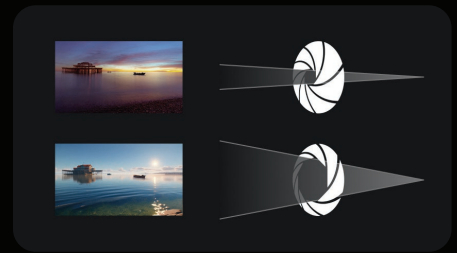

0.9–1.5 Optical Zoom: Flexible Room Selection

With a 0.9–1.5 throw ratio, it offers greater flexibility than traditional home theater projectors, allowing for use in compact rooms without pixel loss during zoom operations.

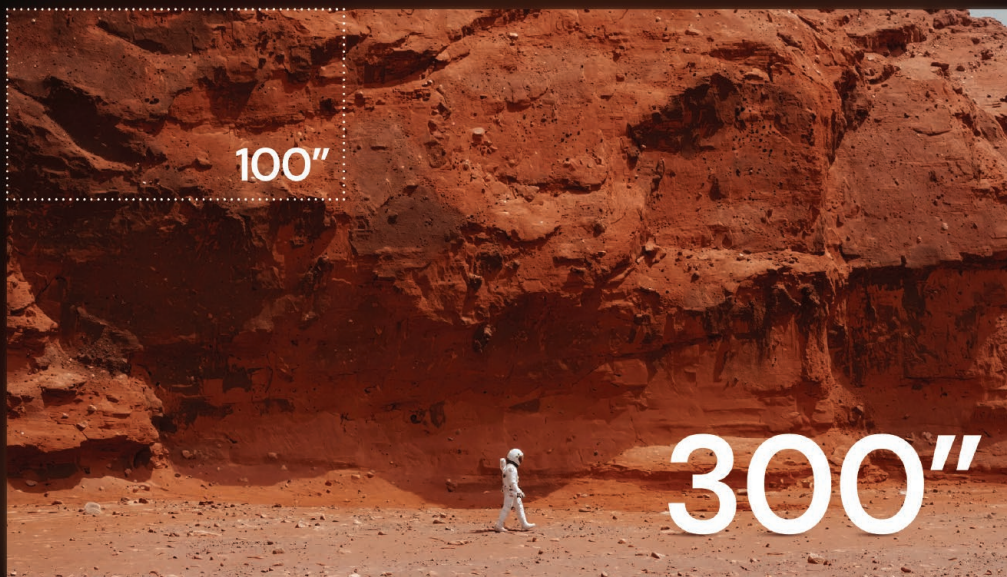

+/-105% Offset (+/-55% vertical lens shift): No Need for Perfect Mounting

The +/-105% Offset (+/-55% vertical lens shift) allows you to adjust the image to your eye level without requiring precise mounting.

Dynamic IRIS: Enhanced Contrast and Depth

Automatically fine-tunes the aperture to optimize black levels and contrast, delivering richer blacks and greater detail across all lighting conditions.

Go Big, 300 Inches for Any Wall

Our 4K UHD projector projects incredibly vivid images onto any wall, with custom screens crafted to your exact dimensions.

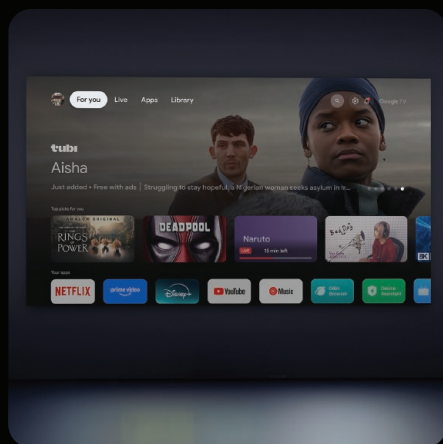

Smarter,
Smoother,
Faster

MT 9618

Epic Gaming Experience

Immerse yourself in gaming with ultra-responsive 4ms input lag at 1080P@240Hz on a stunning 21:9 or 32:9 ultra-wide screen. Enjoy next-level gameplay with custom modes, pinpoint crosshair accuracy, and enhanced night vision.

Stream with Ease

Built-in Google TV+ brings you instant access to top streamingf platforms, including Netflix, YouTube, Amazon Prime Video, Disney+, HBO MAX, Hulu, Apply TV+, and Paramount, all in one place.

Seamless Memory Sharing

Instantly view and share photos and videos with Apple AirPlay 2, Miracast, Chromecast, and a built-in media player, making it easy to relive your memories anytime.

Smart Home, Smart Life

Effortlessly connect with Alexa, Google Home, and Apply Home to control your projector with ease. Experience a smarter, more connected home where entertainment and convenience go hand in hand.
